Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3, 10, 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites "attempts to achieve" which is vague and indefinite because there are no meets and bounds.

Claim 10 recites "opportunity" which is vague and indefinite because there are no meets and bounds.

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. Claim 13 is improper as explained in MPEP 608.01(n) and therefore vague and indefinite regarding what is being claimed. The fact that independent and dependant claims are of different statutory classes does not, in itself, render the latter improper. The test as to whether a claim is a proper dependant claim

is that it shall include every limitation of the claim from which it depends (35 USC 112, fourth paragraph), or in other words that it shall not conceivably be infringed by anything which would not also infringe the basic claim. Regarding claim 13, since the computer readable medium of claim 13 may perform other methods it is not a proper dependant claim. Claim 13 must be written in independent form as a computer readable medium if desired to be claimed as such. If claim 13 is a dependant method claim, recitation in the preamble must match the previous statutory class claimed by dependency.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Singer et al in view of Keith.

Singer discloses a computer-based method for use by a trader in an electronic trading system that includes at least one computer terminal (fig 1) connected over a network to at least one electronic exchange (para 0029). There is initiated a first order associated with a spread at a desired spread price in a synthetic spread market, wherein the synthetic spread market is associated with a first real market, and wherein

Art Unit: 3624

the first real market is offered by at least one electronic exchange (para 0023). In response to initiating the first order, automatically sending a second order to an exchange-provided spread market, wherein the synthetic spread market and the exchange-provided spread market offer interchangeable tradable objects (para 0069). At least two underlying legs are disclosed (fig 4).

Singer et al does not disclose:

wherein the synthetic spread market is associated with a first real market and a second real market.

Keith discloses multiple markets in an electronic trading system connected over a network to at least one electronic exchange (para 0004).

It would have been obvious to one with ordinary skill in the art to include wherein the synthetic spread market is associated with a first real market and a second real market because Keith teaches advantages to multiple markets (para 0004).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
